15th On Farm Sale

Monday March 23 2020 11am

Inspections from 9:00am

On Offer...

Burrawang Stud Sires

31 Stud Type 5 Rams

22 Stud Type 4 Rams

56 Commercial Type 3 Rams

About Burrawang Rams

Quality Control Process

Burrawang uses an uncompromisingly strict standard of quality when selecting animals offered for sale. Our quality control standards are applied throughout each animal's life to ensure animals offered for sale meet the Breed Standard of Excellence for structural correctness and carcass quality.

Independent Typing and Catalogued Comments

This group of sale rams were independently inspected by Australian and South African qualified breed inspector, ***Philip van Schalkwyk***, on February 29 2020. The result of Mr van Schalkwyk's inspection of each animal is reflected as 'Type' in the catalogue.

Performance Measurements

Weight, eye muscle depth and rib fat depth, included in each animal's information, were measured by Sheep Genetics (LambPlan) qualified scanner, Trevor Pearce at various intervals including early post weaning (EPW) or post weaning (PW) and on February 24, 2020. EPW is defined as 120 to 210 days old while PW is defined as 210 to 300 days old. Actual age at time of measurement is provided in the catalogue.

Average daily weight gain is provided for the period between each weighing as indicated by ADG (kg/inv.)

Eye Muscle Shape

With the assistance of Sheep Genetics qualified scanner, Trevor Pearce, Burrawang has been recording the shape of our animals' eye muscles as well as eye muscle depth (EMD). While eye muscle depth is a good indicator of carcass quality, the shape of the muscle is equally important to meat yield. Shape is scored from 1 to 3 with 3 indicating the most productive shape.

Our stud and commercial breeding selections now incorporate this important production indicator. For the first time, we are including Eye Muscle Shape for each of the rams on offer in this sale. Each ram was scored by Trevor Pearce and the score is shown in the information for each lot.

Working Rams

Some of the rams offered for sale were used as sires in recent stud and/or commercial joinings; this is indicated in the notes section for these rams. It is our policy that all rams are On Farm Sale rams are tested prior to sale; all tested negative for Ovine Brucellosis in early March.

Health, Presentation and Ready-to-work Condition

- To ensure the animals are healthy, all of them received Glanvac® 6 in 1 vaccination at tailing, weaning and at prescribed regular intervals including on February 5, 2020. On February 5, 2020, the rams also received Cydectin® drench.
- Burrawang's flock is Accredited Ovine Brucellosis Free; Certificate OB-TR expiring 2/28/22.
- Burrawang's OJD status is MN1; clear of OJD with certificate NS18176.
- To facilitate assessment of conformation at sale, rams were shorn in December 2019.
- Rams are presented in good condition with a healthy fat cover, so they are ready-to-work.

Satisfaction Guarantee

Burrawang is committed to customer satisfaction. These rams are guaranteed fertile so you can buy with confidence. We are happy to guarantee your satisfaction with either money back or a replacement.
